WBN Request No. G4-35640

The Department of Ecology (Ecology) has determined the use of groundwater described below will be water budget neutral with respect to Total Water Supply Available (TWSA). The reach of the Yakima River affected by the groundwater appropriation can be mitigated by release of stored water from a U.S. Bureau of Reclamation (USBR) storage facility upstream from the affected reach. Supplemental consultation under Endangered Species Act (ESA) is, therefore, not required pursuant to Article 18.b of the contract.

1. The groundwater use that will be offset by the trust water right is for domestic supply and 0.023 acres of lawn and garden irrigation. The use of water will be located within NE $\frac{1}{4}$ NW $\frac{1}{4}$  of Section 12, T. 20 N., R. 13 E.W.M. (Parcel No. 568436). The consumptive water use will be 0.081 acre-feet from April 1 through August 31, and 0.076 acre-feet from September 1 through March 31.
2. The trust water right (No. S4-05259CTCL@2sb7) was placed into the Trust Water Right Program by Suncadia.
3. The Trust Water Agreement between Ecology and Suncadia can be found at the following website:  
[http://www.ecy.wa.gov/programs/wr/cwp/images/pdf/suncadia\\_tw\\_agreement.pdf](http://www.ecy.wa.gov/programs/wr/cwp/images/pdf/suncadia_tw_agreement.pdf)
4. Ecology assigns 0.076 acre-feet of Trust Water Right Certificate to the USBR-Ecology Exchange Contract (Contract No. 09XX101700). The term of the assignment is from September 19, 2013 to January 29, 2049.
5. The total payment for 36 years, based on the rate of \$22/ac-ft/yr in Article 15.a, is \$60.19.
6. Ecology plans to assign 0.025 acre-feet of the Trust Water Right to be managed within the Trust Water Right Program for instream flow purposes to benefit the Yakima River below Parker.
